Phone: +91-8527815660 | Email: sparshduggalw@gmail.com | linkedin.com/in/sparsh-duggal |
sparshduggal.vercel.app | Bangalore, Karnataka

SKILLS

Languages: Java, Kotlin, Python, GoLang, JavaScript/TypeScript, C/C++

AI / ML: LangChain, LangGraph, OpenAI API, Ollama, Whisper, Chroma, RAG, Prompt Engineering, LangSmith

Frameworks: Spring Boot, FastAPI, Hibernate, Next.js, React

Databases: PostgreSQL, MongoDB, MySQL, Redis, SQLite

Infrastructure & Tools: AWS, Kubernetes, Docker, Jenkins, Kafka, Elasticsearch, Kibana, Git

Architecture & Concepts: Distributed Systems, Microservices, Event-Driven Architecture, Agentic AI, Async Processing, Observability

EXPERIENCE

Groupon

Aug 2024 – Jun 2026

Software Development Engineer II

Bengaluru, India

- Engineered an AI-powered on-call automation platform integrating GChat alert channels with a Kibana MCP server for automated root cause analysis using LLMs, reducing incident resolution time by 10x.
- Led end-to-end onboarding of Costco Canada, Groupon's highest-revenue partner, coordinating integration, ingestion, and compliance workflows across multiple teams.
- Architected a merchant connectivity monitoring platform that reduced partner issue detection time from 4 days to near real-time through proactive alerting and automated diagnostics.
- Architected an SFTP-based distributed data pipeline for the Rewards Network API migration, designing download, validation, retry, and async processing workflows end-to-end.
- Managed backend ingestion services for real-time availability data from high-revenue partners including Universal Studios, Viator, Ingresso, Ventrata, and Costco, ensuring reliability and data integrity at scale.
- Streamlined 5+ recurring engineering and operational workflows using AI-driven tooling and LLM-assisted development, significantly reducing manual toil across the team.

Leap Finance

Jan 2022 – Jan 2024

Software Development Engineer I

Bengaluru, India

- Revamped payment processing systems through backend optimization and architectural improvements, resulting in 50% better performance and improved platform scalability.
- Enhanced platform security by integrating SonarQube vulnerability scans, migrating 100+ secrets to Vault, and implementing inter-service authentication, reducing security incidents by 40% within 6 months.
- Spearheaded development of the TestPrep Microservice with simulated examinations and performance analytics, contributing to a 25% increase in revenue.
- Engineered the Teacher Slot Booking System (SPOT) with Zoom integration, streamlining teacher scheduling and improving educational accessibility, increasing revenue by 10%.
- Contributed to migration from monolithic architecture to microservices, improving deployment flexibility, scalability, and maintainability; optimized legacy database queries reducing API response time by 41%.

Samsung Research Institute

Jun 2020 – Jan 2022

Engineer I

Noida, India

- Designed and implemented reject messaging functionality for Galaxy Watch, improving user communication workflows and device usability.
- Resolved 250+ production issues in the Call Service Module and led integration and stabilization of Samsung Call Module across multiple firmware releases.

EDUCATION

JC Bose University of Science and Technology, YMCA

2016 – 2020

Bachelor of Technology in Information Technology

Faridabad, India
